Equipment

- 30mL or 50mL graduate
- Glass stirring rod
- Gloves x1 pair
- 25mL oral amber bottle
- Shrink seal

Procedure

1. Empty the contents of the Mexiletine capsules into the mortar.
2. Triturate powder with a bit of sorbitol until a smooth paste is formed. Add more vehicle to the paste until a liquid is formed. Transfer the contents to the graduated measure. Use additional vehicle to rinse the remaining drug from the mortar.
3. Make up to final volume using sorbitol.
4. Stir well.
5. Transfer the solution to an amber glass bottle.
6. Cap label and apply shrink seal.

Storage: Refrigerate  
expiry: 21 days
