At SickKids, we believe that all critically ill children deserve access to specialized health care regardless of their place of origin or geographic location. We also recognize that travelling for treatment can be an overwhelming experience, so we have put together this package to help you get oriented during your stay.

This package was prepared for families of children receiving health care at The Hospital for Sick Children (SickKids) through the International Patient Program. In this package, you will find a map of SickKids and how to find us, and a map of the hospital and various clinics. You will also find a map of Toronto and the surrounding area, information on transportation, accommodations, medical clinics for other family members, shopping, cultural neighbourhoods and community centres, places of worship, and other information for your individual family needs.

International Patient Program

The International Patient Program provides a single point of access, service and coordination for international families seeking treatment at SickKids. All international inquiries for treatment are reviewed through an evaluation and triage protocol, including an assessment by a multidisciplinary medical team.

We provide centralized communication to ensure that client needs are met in a timely manner. We believe that all international patients should be provided with the highest quality of care, and those seeking treatment at SickKids should receive timely access through a formal and equitable review process.

Overview of the International Patient Program

- Facilitates referrals to enable access to specialized medical treatment for international patients without access to vital care in their region
- Acts as the single point of contact for all international patients
- Coordinates services from initial patient inquiry to post-treatment and repatriation to home country
- Provides medical and nursing expertise dedicated to patient case management for international patients
- Supports inquiries through dedicated coordinators for international patients
- Facilitates telemedicine consultations and follow-up

We have a dedicated team to support the unique needs of international patients and their families.
